ITHA is proud to invite our Youth to an exclusive event this spring break. For many months our team has been working with our community elders and language experts to put together an immersive program for our youth to better learn the language of their people. We know that connecting with our languages, our culture, and our communities are some of the most important parts of our healing journey. So join us for a week of learning, activities, culture, and traditions.

**Activities Include:** *Fish Processing, Traditional Medicine Gathering, exploring Traditional Sites, Cultural Teachings, Beach Walks, and Traditional Craft making. And more.*

**Registration Required (See Below)**

**Lunch Provided!**
